

Outdoor Heating System

Patio Heaters are designed and crafted to bring Warmth, Comfort, Safety, Convenience, & Enjoyment to your "OUTSIDE" area

EPH, Patio Heater (S.Steel)

100% Stainless Steel (#304): For Excellent Finish & Durability

Gas Cylinder Used: Both Domestic & Commercial

Area Coverage: 10 Feet diameter

Fuel Type: LPG, Extremely Low Running Costs. No electrical connections required.

Pilot Control: Piezo Auto ignition switch.

Larger Reflector: 83 cms (for extra space coverage)

Angled Heavy Duty outside Emitter: Directs heat output down for better efficiency and improves overall aesthetics

Heavy Duty inside Emitter: Solid inside emitter adds structural strength, amplifies burner output, reduces wind blowout and reduces heat loss.

Top Burner: Stainless Steel

Heat Output: 12.5KW- 40,000 BTU/Hr

Different Power Settings: 12.5 KW, 7.3KW, 5.5KW

Meets International Standards: CE Approved

Heat Range: 15' - 20' circle of sun - like radiant heat

Raises Temperature: By 35°F

High Operation Time: Will Operate 18 - 25 Hrs from common LPG cylinder (Domestic)

Easy to Assemble and disassemble

Ideal For:

Party Places (Farm Houses), Hotels, Restaurants, Swimming Pools and all other open areas

7.5 Ft
